Lab Assignment 7

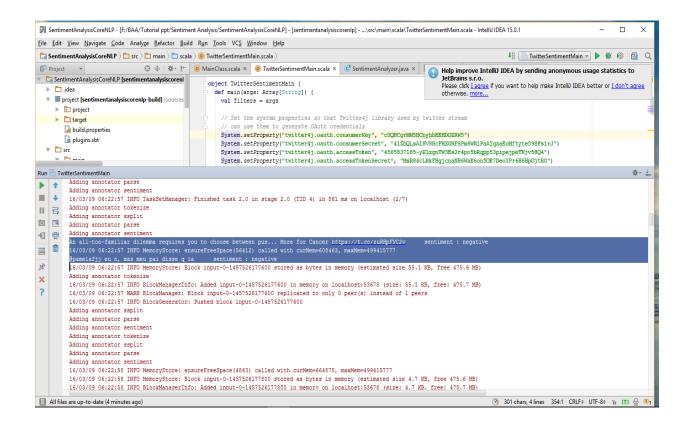

Question 1-

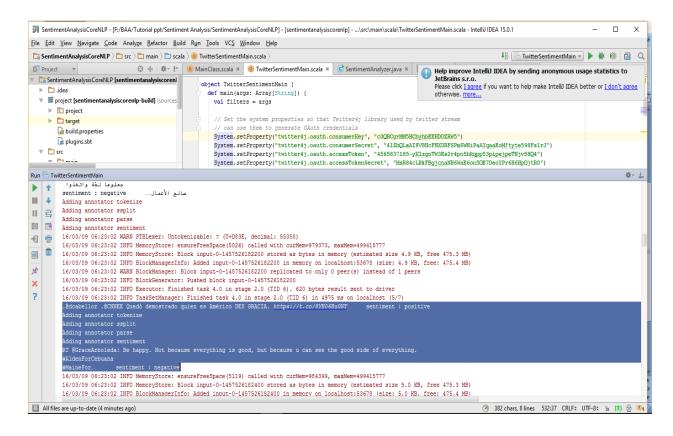

Sentimental analysis using twitter streaming

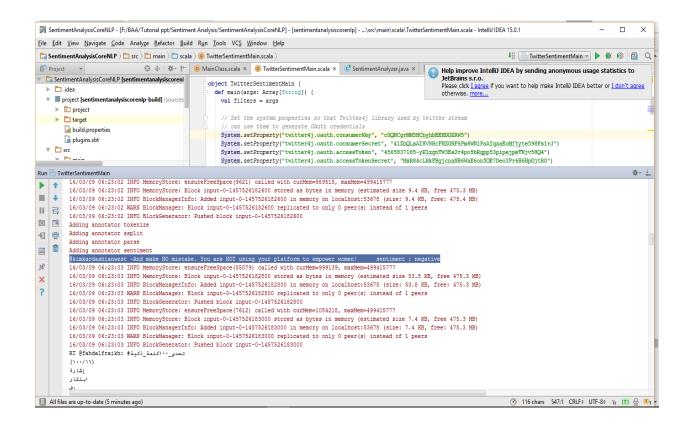

Description:

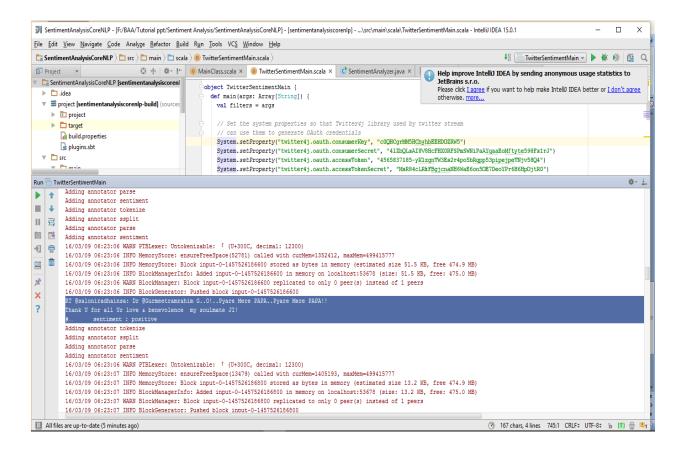

I added TwitterSentimentMain.scala to the existing project SentimentAnalysisCoreNLP given in tutorial 7. This will stream data from twitter and classify sentiment into either positive or negative.

Question-2

Make Recommendation(Related to your Project)

Description:

In this section, I used the SparkMovieRecommendation.scala code to recommend the best places to buy his furniture(FurnitureMalls) to the user. Using 25 handpicked FurnitureMalls, the model recommends top 5 FurnitureMalls based on user preference.

This Screen shot shows the iterations of training:

```
Cot 1000209 ratings from 6040 users on 3706 FurnitureMalls.

Training: 602252, validation: 198919, test: 199049

Question 3

Recommendation through smartphone:

Description:

Now the goal is to send the recommendations of the user to his smart phone. So I have taken this recommendation output above and sent it as a notification to smart phone.

Here is the Screenshot:
